

UMAR MICHAEL

AI Pilot – Vibe Code Specialist | Data Scraping & Extraction
Lagos, Nigeria • michaelayomide132@gmail.com • +234 09069356828

PROFESSIONAL SUMMARY

Technically skilled ICT student with hands-on experience in web scraping, data extraction, Python/JavaScript coding, and automation tools including Apify. Experienced in end-to-end data workflows, quality validation, and structured dataset delivery. Strong analytical mindset with the ability to adapt scraping approaches for dynamic, JavaScript-rendered websites. Eager to contribute technical precision and critical thinking as an AI Pilot on the Tendem project.

CORE COMPETENCIES

- Web scraping and data extraction from static and dynamic websites
- Python and JavaScript scripting for automation and data processing
- Apify platform usage for scalable scraping workflows
- Handling JavaScript-rendered content and interactive web sources
- Data validation, quality control, and structured dataset formatting
- Batch processing and parallelization for large-scale data operations
- Critical thinking and systematic problem solving
- Strong written English (C1/C2) for clear reporting and documentation

WORK EXPERIENCE

Freelance Web Scraping & Data Specialist | Self-Employed

2023 – Present | Lagos, Nigeria

- Designed and executed end-to-end data extraction workflows across complex and dynamic websites, delivering clean, structured datasets.
- Built custom Python and JavaScript scripts to automate scraping tasks, handling pagination, authentication, and JavaScript-rendered content.
- Used Apify and similar tools to scale scraping operations, implementing batching strategies to handle large data volumes reliably.
- Applied validation checks and cross-source consistency controls to enforce data quality standards before delivery.
- Monitored scraping pipelines for failures, adapted workflows to handle site structure changes, and maintained stable operations.
- Managed Meta advertising campaigns (Facebook & Instagram) with data-driven targeting, leveraging analytical skills for performance tracking.

EDUCATION

Bachelor's Degree in ICT (In Progress) | University of Agriculture Science and Technology, Ithugh, Benue State

Currently Enrolled • Information and Communication Technology • Expected Graduation: 2027

TECHNICAL SKILLS & TOOLS

- Languages: Python, JavaScript
- Scraping & Automation: Apify, custom scripts, browser automation
- Data Processing: JSON, CSV, structured dataset formatting
- Web Technologies: HTML, dynamic/JavaScript-rendered sites, REST APIs
- AI Tools: OpenRouter and LLM-assisted workflow integration

- Digital Marketing: Meta Business Suite, Facebook & Instagram Ads
- Other: Strong internet research, data quality assurance, documentation

WHY I'M A GOOD FIT FOR MINDRIFT – TENDEM PROJECT

I bring both the technical skills and the critical thinking mindset that the AI Pilot role demands. My experience in web scraping, data validation, and automation tools like Apify aligns directly with the Tendem project requirements. I understand how to work alongside automated agents — handling the edge cases, quality control, and decision-making that AI cannot do alone. I am available for part-time remote work and fully committed to delivering accurate, well-structured results on every project.

English Proficiency: C1/C2 • Available for remote, part-time, project-based work
